PRODUCT FEATURES

AI-Driven Personalization

USER PERSONA

BACKGROUND

Priya Sharma

26 year old, Junior Software Developer
Bangalore, India

Income: ₹7,00,000/year

Relationship Status: **Single**

Tech Savviness: **High** (comfortable using digital tools and fintech apps)

Rajesh Mehta

35 year old, Senior Marketing Executive
Mumbai, India

Income: ₹15,00,000/year

Status: **Married with 1 child**

Tech Savviness: **Moderate** (comfortable using mainstream apps, but less with niche tech products)

Neha Kapoor

30 year old Female, Freelance Graphic Designer (Delhi, India)

Income: ₹10,00,000/year (variable income)

Status: **Engaged**

Tech Savviness: **High** (regularly uses digital tools for work and personal life)

PAIN POINTS

- **Unplanned expenses:** Priya often faces unexpected expenses and feels her spending is out of control.
- **Investment knowledge:** She has very little understanding of financial instruments in India (like SIPs or ELSS).

- **Lack of time:** Rajesh is too busy to actively manage his finances.
- **Budget adherence:** While he knows the importance of budgeting, he finds it hard to follow one consistently.
- Overwhelming options.

- Runs her own freelance business.
- Wants a tool to help her manage both personal and business expenses.
- Also preparing for her wedding and needs to balance short-term expenses with long-term financial planning.

GOALS

- **Save for the future:** Build an emergency fund and save for a future international vacation.
- Begin investing.
- Improve budgeting.

- **Family security:** Save for his child's education and plan for a home renovation.
- **Invest effectively:** Diversify his investments across safer options.
- Automate budgeting.

- **Manage variable income:** Track irregular income and adjust her spending and savings accordingly.
- **Save for the wedding:** Plan a wedding budget.
- Invest for stability.
-

MOTIVATION

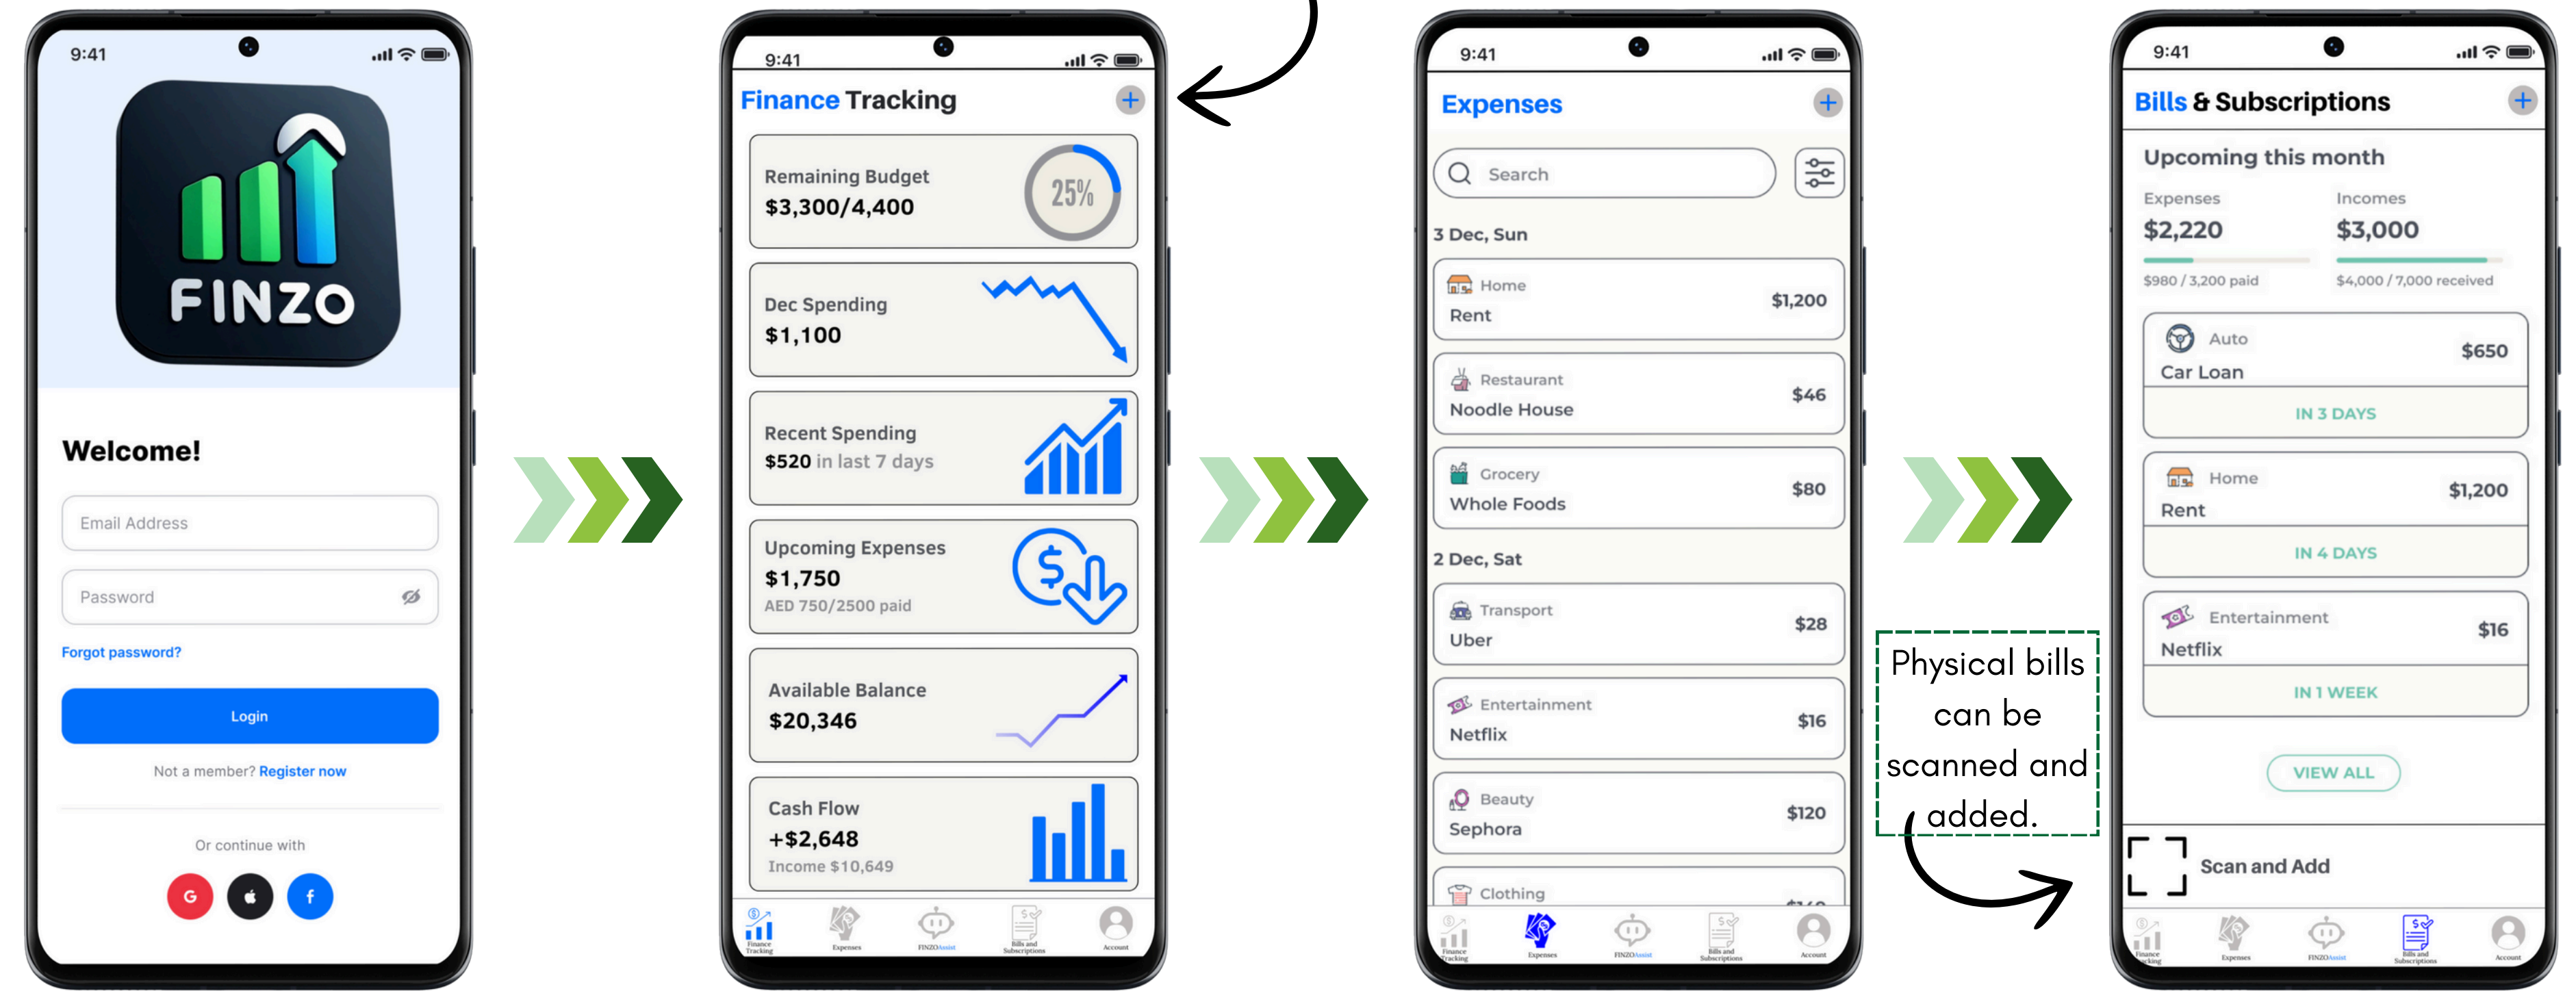

- **Financial independence:** Wants to gain control over her finances.
- **Future planning:** Keen on building a more secure financial future.

- **Financial planning:** Rajesh wants a tool that helps him streamline his family's expenses while growing his wealth efficiently.
- **Long-term security:** Focused on building a stable financial future for his family.

- **Financial stability:** Neha wants to manage her freelance income more effectively
- **Savings discipline:** Determined to save for both personal goals and business needs.

USER FLOW

The user flow through all interface of the app

Login to the app via mail or other options and setup of account followed by biometric authentication

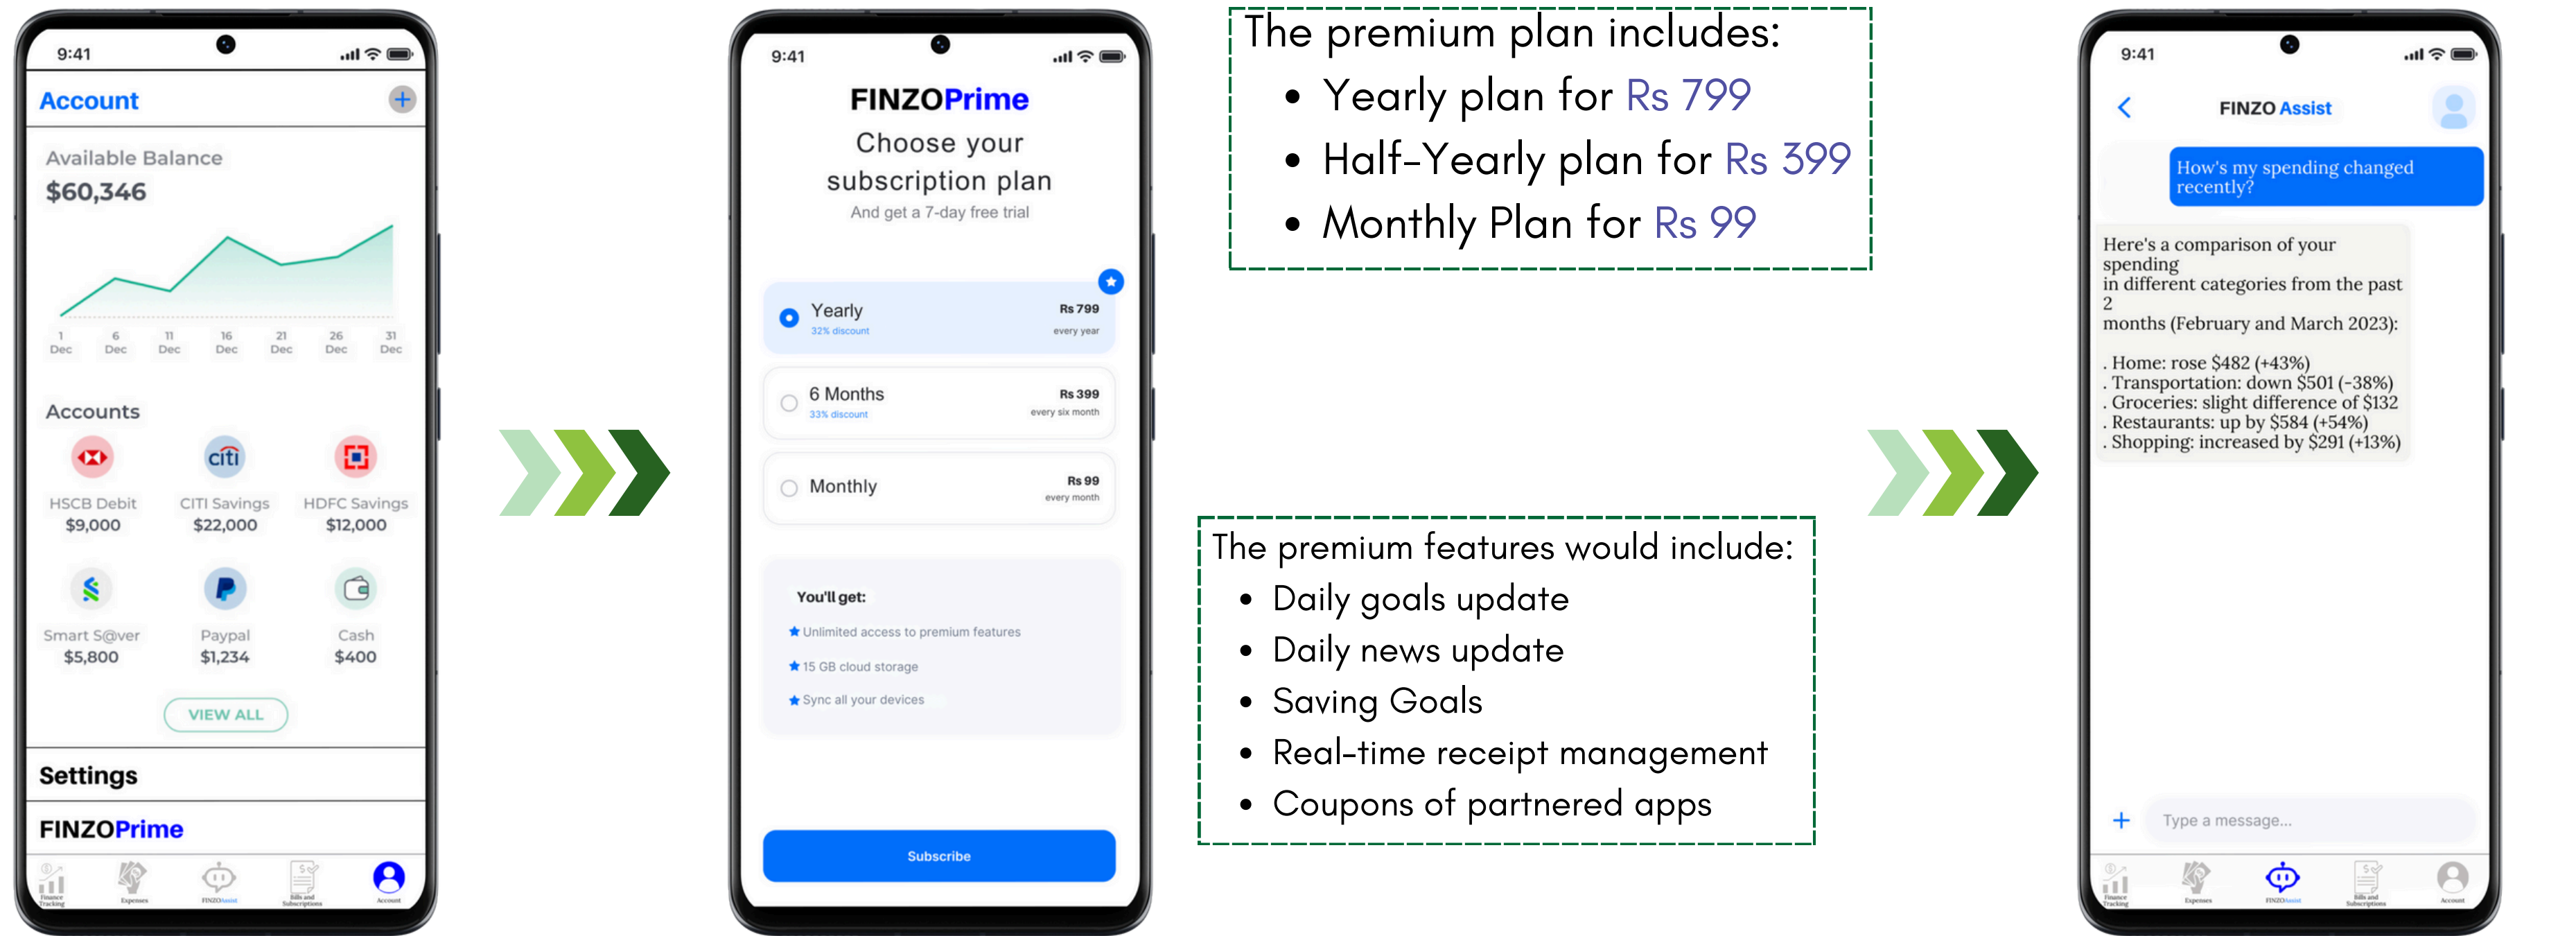

Financial tracking would be done by the app. It would have the above features.

Expenses can be categorized.

All the pending bills and upcoming subscriptions at one place.

USER FLOW

The user flow through all interface of the app

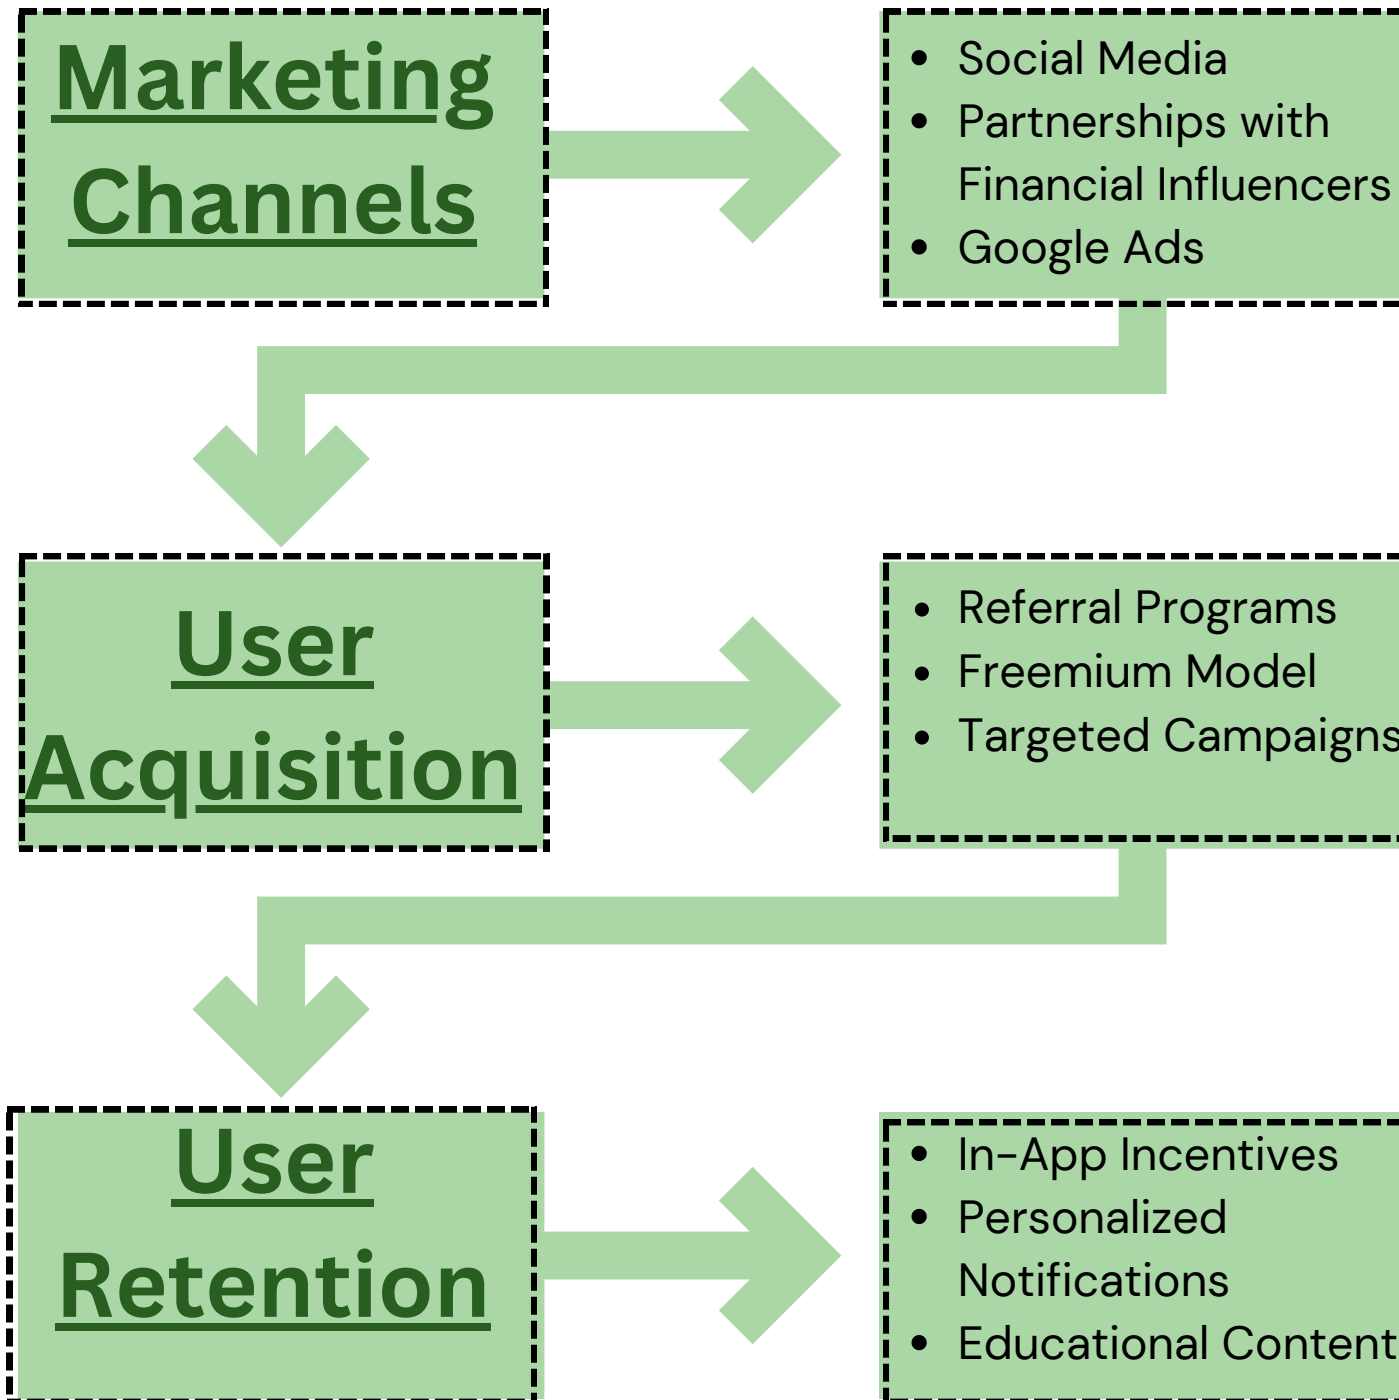

The account tab will hold all the accounts and bank detail of the user along with the settings and premium subscription option.

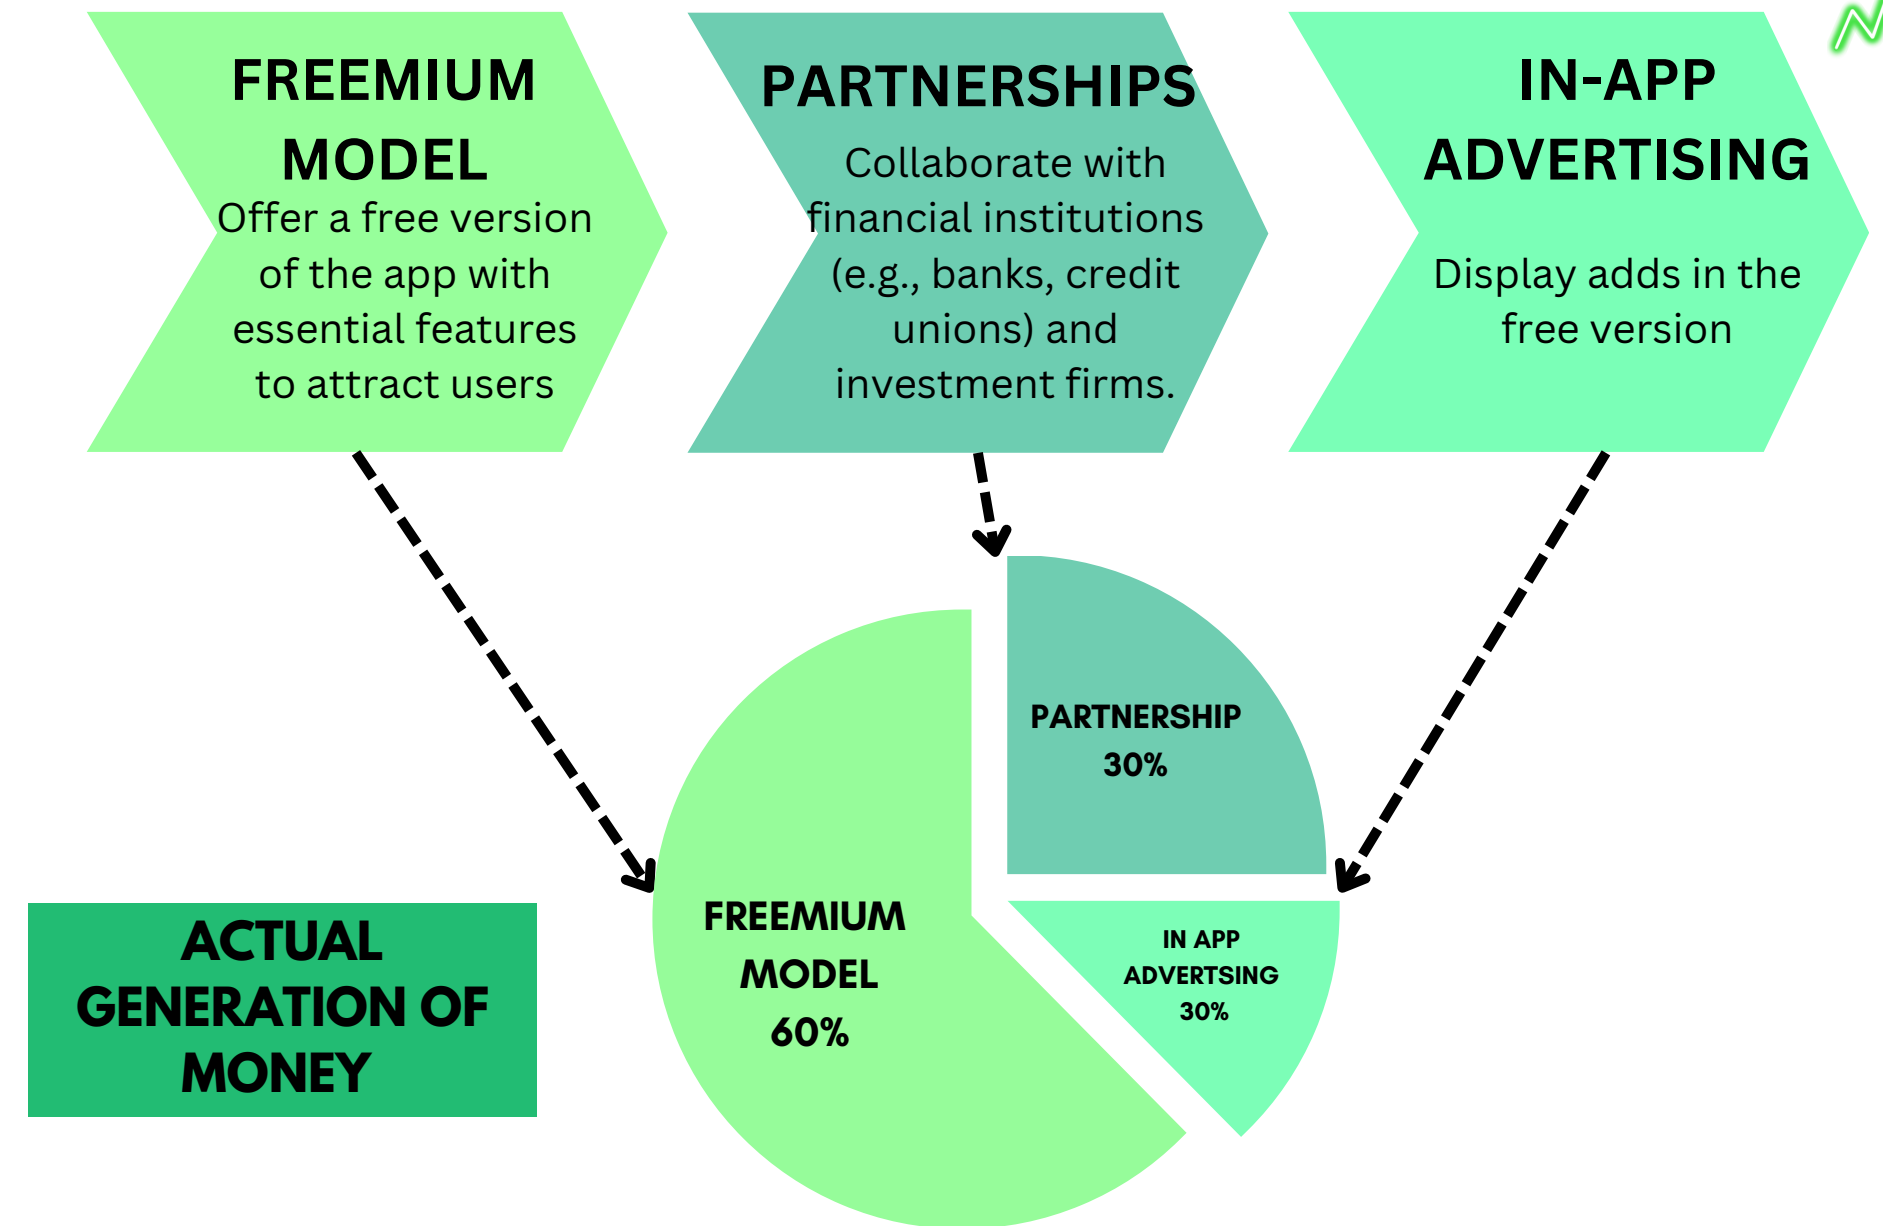

This would be the subscription plan for the app.

The FINZO Assist is an AI bot which will try to provide possible solutions to users financials' related doubts and queries.

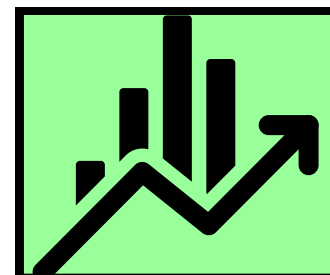

GO-TO MARKET STRATEGY

MONETIZATION STRATEGY

MARKET SIZE AND GROWTH

The Global AI in Personal Finance Market size is expected to be worth around USD 3.7 Billion By 2033, from USD 0.7 Billion in 2023, growing at a CAGR of 18.1%

KPIs FOR SUCCESS

- Measuring retention rate as it indicates that users find continued value in the tool.
- A low churn rate reflects long-term satisfaction and utility of the product.

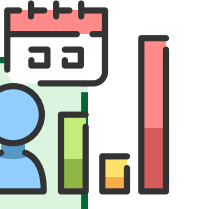

User Retention & Churn

User Engagement Metrics

- Calculating the Daily Active Users (DAU) and the Monthly Active Users (MAU)
- Measuring the time spent on app and on which particular feature to further improve it.

- Net Promoter Score (NPS) indicates a positive user experience and strong brand loyalty.
- In-App User Feedback & Surveys helps understand pain points, areas for improvement, and new feature requests.

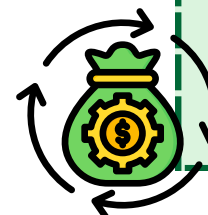

Customer Satisfaction Metrics

Monetization Metrics

- Measuring how many free-tier users upgrade to premium features as a high conversion rate reflects the value users place on advanced functionalities.
- Tracking the average revenue generated from each user through premium subscriptions or affiliate partnerships.

Financial Goal Achievement

- Tracking the average time it takes for users to achieve their financial goals using the AI recommendations as shorter times indicate effective financial guidance.

Financial Impact on Users

- Measuring savings growth over time to reflect that we're helping on saving money.
- Tracking budgets adherence rate as it shows that users are adopting the app's financial advice.
- Measuring the reduction in overspending as suggested by the AI.

CHALLENGES

Data Privacy and Security Concerns

Challenge:

Users may be hesitant to share financial data.

Mitigation:

Implementing bank-grade encryption, two-factor authentication, and adhere to GDPR and other regulatory standards.

Accurate AI Predictions & Recommendations

Challenge:

Ensuring that AI-driven budget suggestions, expense categorization, and investment recommendations are personalized, accurate, and contextually relevant.

Mitigation:

Continuously improve the AI algorithm using user feedback and financial data. Regularly update the system based on evolving market conditions, user spending behavior, and investment trends.

Competition in Fintech Space

Challenge:

The personal finance management space is competitive, with many existing solutions offering similar features.

Mitigation:

Differentiate by emphasizing AI-driven personalization and long-term financial planning. Offer seamless integration with other financial tools and apps.

User Trust & Adoption

Challenge:

Convincing users to trust the AI-driven financial advice, especially when dealing with sensitive issues like money.

Mitigation:

Build credibility by partnering with reputable financial institutions or advisors. Provide transparent explanations for AI recommendations, showing users how their financial advice is generated.

User Engagement & Retention

Challenge:

Maintaining long-term user engagement and avoiding churn after the initial onboarding phase.

Mitigation:

Utilize behavioral nudges to keep users engaged. Introduce personalized challenges to motivate users.

Monetization Without Annoying Users

Challenge:

Monetizing the app without alienating users through ads or overly aggressive upselling tactics.

Mitigation:

Focus on value-added premium features that users will be willing to pay for, such as advanced investment guidance or personalized financial reports along with coupons and cashbacks on partnered payment apps.

THANK YOU!
